How does one stand out in a world with so much noise?

Weaknesses:
- I'm not good at sales
- Sometimes I have more ideas than I can easily put into paragraphs
- The past year of stress has been demoralizing

Strengths
+ I know my weaknesses
+ I'm good at learning
+ I know Engineering and Art pretty well
+ I've been preparing for this moment in technology since 2016

I got fired twice last year

- Takeaway
  - 5 months of interviewing led to 4 months of employment
    - Now I'm optimizing for the shortest interview process, emphasizing manager-fit over team-fit
  - I have ADHD
    - The past year has been spent finding ways to manage without medication
    - I'd like to have insurance long enough to use it
- The roles I had
  - Senior Software Engineer
    - feedback
      - "you need to practice speaking to lower IQ audiences"
    - reflection
      - I've practiced breaking things down into simpler chunks
  - Software Engineer
    - feedback
      - "what you're saying sounds too abstract"
    - reflection
      - I've practiced associating visuals with abstract concepts

Seeking

- $150k salary
- Some no-meeting days
- Enough time to learn your language
